## **READ THIS FIRST: Special notes and considerations**

- **Firmware upgrade warning:**
  - IMPORTANT: Always evaluate the firmware update on one device in the customer specific ecosystem and verify functionality before proceeding to update a fleet of devices
  - Any device running xxxBL.061.001 - xxxBL.061.999 must first update to a FW7 based release such as xxxBL.076.308 before upgrading to xxxBL.081.015 or newer. Failure to do so can result in a device that will not power up to “ready” state
  - Any device running FW5.1 or older (xxxxx.051.yyy or smaller numbers) must first update to a FW7 based release such as xxxxx.076.308 before upgrading to xxxxx.081.015 or newer
  - CS72x/CX72x Series devices and their equivalents running ATL.03x.yyy or ATL.02x.yyy firmware must first update to CSTAT.041.090 or CXTAT.041.090 as an initial intermediate release before updating to a FW7 based release, such as xxxxx.076.308, and then finally updating to xxxxx.081.015 or newer
  - Contact Lexmark Technical Support to obtain intermediate releases if needed
- **Firmware downgrade warning:**
  - Firmware downgrade is no longer supported, if there is a reason firmware downgrade is required, please contact Lexmark Technical Support and see KB Article SO8017
  - Downgrading firmware can result in exposure to known security vulnerabilities and will result in the loss of Apps, Security Features, and Settings
- **Ensure the firmware you download is the correct one for the product you have**

- Fix for an issue where CS/CX82x and CX860 devices and their equivalents did not show the photoconductor status with other supplies statuses (CSTPP and CXTTP firmware versions)
- Fix for an issue where CS/CX82x and CX860 devices and their equivalents were not able to clear the "Missing Photoconductor" IR after the error state was resolved (CSTPP and CXTTP firmware versions)
- Resolve registration issues with Microsoft Universal Print
- Fix for an issue that was requiring AirPrint to be enabled to use IPP over USB
- Add support for additional media sizes to Prescribe's Set Paper SiZe (SPSZ) command with a parameter of 0

  - Fix for issue where held faxes are not held after out of service wipe
- Fixes for multiple sources of 900 errors, some causes include:
  - “callback\_timer\_expired” 900.00 error occurs in the middle of printing certain jobs
  - “powermanager” 900.00 error intermittently on devices
  - “lwsmd” 900.00 error intermittently on devices
  - 900.00 error when scanning via Cloud Bridge Solutions with an unsupported media size

Known Issues/Notes of Interest:

- A change in the IPP over USB device behavior in this firmware update may cause a second copy of the driver to show up on the PC for devices that are USB connected to a Windows machine running a Lexmark driver

### Additional notes and considerations

– **Firmware upgrade warning:**

- It may take up to 20 minutes and multiple firmware steps to update devices to FW23 code if the code level currently on the device is FW2 or FW3 based
- To know if the device is currently running FW2 or FW3 based code, check the firmware version on the device. FW2 and FW3 based code will have the following version format:
  - ATL.03x.yyy or ATL.02x.yyy
  - CB.03x.yyy or CB.02x.yyy
  - PP.03x.yyy or PP.02x.yyy
  - YK.03x.yyy or YK.02x.yyy

–

– **Understanding firmware nomenclature:**

- Beginning with FW4, firmware versions are named in the pattern ABCDD.xxy.zzz where:
  - A tells whether the printer is Mono or Color (M = mono, C = color)
  - B tells whether the printer is Single or Multi-function (S = single function printer (SFP), X = multi-function printer (MFP))
  - C tells whether the UI is a touch screen, non-touch/non-eSF capable, or “lite feature set” (T = touch screen with 4.3” or larger screen, N = non-touch screen or non-eSF capable and non-lite, L = lite )
  - DD tells the model family
  - xx tells the major firmware EC version, while y tells the minor firmware EC version (050 = FW5.0, 051 = FW5.1, etc.)
  - zzz tells the release number within that firmware EC
- FW2 or FW3 firmware versions are named in the pattern DD.xxy.zzz using the same mapping as above. However, the DD model families used on FW2 and FW3 were changed on FW4 and newer:
  - ATL on FW2 and FW3 becomes AT on FW4 and newer
  - CB on FW2 and FW3 becomes AT on FW4 and newer
  - YK on FW2 and FW3 becomes PP on FW4 and newer
